TAQTICS | CONNECT | GENPACT | BYJU'S

Product Specialist who ships product solutions in production and validate working tools with AI rather than waiting on engineering.

PROFESSIONAL EXPERIENCE

Taqtics — *Apr'25 – Present*

Product Specialist, Enterprise SaaS

- Reduced manual photo review by **~60%** by building **AI visual merchandising review** that checks store photos against the planogram and flags deviations for manager validation (confidence thresholds, precision/recall tracked), plus **AI audit summaries** of critical failures, so managers act on exceptions, not every photo and report.
- Replaced manual roster-building for store managers with **TimeShift, an AI staff-scheduling tool** taken from discovery to production, generating rosters from sales and footfall with manager override, **live with real users**.
- Cut account launch time from **~8 weeks to ~4 weeks** by replacing bespoke client builds with **configurable workflows across 6 modules**, so new accounts go live on the standard product with far less engineering effort.
- Drove adoption by **50+ clients**, with 12–13 reporting **~30% lower frontline attrition**, by launching 30/60/90-day onboarding paths linking training, quizzes, assessments and manager sign-off, replacing ad-hoc onboarding.
- Cut median issue-resolution time from **15 days to under 2 days** across **20+ clients** by redesigning the failed-check → corrective-action flow so every failed audit item creates an action with an owner, severity, due date, escalation and photo proof, where failures previously ended as reports with no follow-up.
- Turned recurring reporting requests into **configurable analytics using internal and external APIs**; delivered **50+ client dashboards** without requiring changes to the core product for each report.
- Cut checklist setup from **~2 days to under 2 hours** and enabled **15+ account launches** without custom engineering by building an **AI SOP-to-checklist tool** that converts a client's SOP document into an import-ready checklist, replacing manual re-typing.

Connect — *Mar'24 – Sep'24*

Product Management Intern

- Helped launch a **services marketplace on web and mobile**, coordinating design, engineering and content; **52 of 80 vendor quotes were accepted (65%)** in the first month.
- Built the **FY2024 monetisation model**, mapping commissions and vendor fees to customer-provider interactions and prioritising revenue opportunities that could be validated first.

Genpact — *Feb'23 – Mar'24*

MIS & Fraud Analytics Associate

- Analysed transaction data for a **US fintech client**, defining anomaly signals that were adopted into ongoing **fraud monitoring**.
- Built **Power BI and Excel dashboards** used across the team, reducing error-resolution time by **20%**.

BYJU'S — *Sep'22 – Oct'22*

Business Development Intern

- Closed **Rs. 50,000** in four weeks from **120+ self-sourced qualified leads** through consultative product demos, structured objection handling and CRM-driven follow-up

PRODUCT PROJECTS

Implementation Tracker — *Taqtics | Internal tool*

Product & Prototyping

- Built a shared view of trial, implementation and account-management stages with timelines, risk flags and deviation logs; used daily by **10-15 colleagues**.
- Iterated on team feedback using **Next.js, Supabase and Claude Code**, with read-only access for sales.

EDUCATION

B.Sc. (Hons.) Electronics — SGTB Khalsa College, University of Delhi — 1st Division — 2022

POSITIONS OF RESPONSIBILITY

ETRAM, Western Dance Society
SGTB Khalsa College

President | *Sep'21 – Jun'22*
Led a **50+ member society** across budget and events; secured brand partnerships including Realme

CERTIFICATIONS & ACHIEVEMENTS

Energy Conservation

- Represented **Haryana state** twice at the National Energy Conservation Programme, Bureau of Energy Efficiency (Govt. of India)

SKILLS

Product: Discovery, PRDs, prioritisation, roadmaps, workflow design, rollout planning, success metrics
AI & Data: LLM workflows, model evaluation, prompt design, SQL, Python, Power BI, Excel
Technical & Tools: REST APIs, JSON, Figma, Miro, Jira, Notion, Supabase, Claude Code, Antigravity
